Technical Skills

Frontend: JavaScript (ES6+), React.js, HTML5, CSS3, Tailwind CSS, Framer Motion, Bootstrap

Backend & Databases: Node.js, Express.js, MongoDB, REST APIs

Tools & Systems: Git, GitHub, Linux/Ubuntu CLI, Postman, Vite, XAMPP

Education

- | | |
|---|---------------------|
| Bhai Gurdas Polytechnic College , Diploma in Computer Science Engineering | Sangrur, Punjab |
| <ul style="list-style-type: none">Maintained consistent technical academic performance.Acquired strong foundational knowledge in software development, data structures, and system configurations. | Aug 2024 – May 2026 |
| Govt. Industrial Training Institute , ITI (MMV) | Nabha, Punjab |
| <ul style="list-style-type: none">Achieved 86% Grade and Ranked first in Class.Selected as a Machine Operator at Preet Tractors during a 3-month NCTV Industrial Training program. | 2024 |
| Arya Sen. Sec. School , 10th & 12th Standard Education | Nabha, Punjab |
| <ul style="list-style-type: none">Achieved 90% in 10th Grade matriculation.Achieved 87.8% in 12th Grade examinations. | 2024 |

Projects

- | | |
|---|---------------------|
| Project 1: Campus Help Desk Application | Mar 2026 – Apr 2026 |
| <ul style="list-style-type: none">Engineered a full-stack web application using the MERN stack to streamline and automate campus issue reporting.Implemented secure client-side routing and state management utilizing React Context API (AuthContext). | |
| Project 2: GamesHub | Feb 2026 – Feb 2026 |
| <ul style="list-style-type: none">Integrated and consumed open-source REST APIs to dynamically aggregate data from 10+ digital storefronts.Mastered asynchronous JavaScript execution to manage dynamic UI data rendering cleanly.Utilized Bootstrap's fluid grid systems and utilities to construct a highly responsive front-end interface. | |

Certifications & Hobbies

- Open Source:** Active open-source contributor managing and versioning engineering projects via Git, GitHub, and Linux CLI environments.
- Software:** Tech enthusiast who enjoys experimenting with diverse Linux/Unix operating system distributions and actively beta-testing emerging software utilities for system optimization.
- Benchmarking:** Monitor real-time performance metrics, kernel optimizations, and technical hardware specifications for modern PC gaming engines.
- Literature:** Avid reader of philosophical books, focusing on logic, critical thinking, and structured analysis to approach complex technical problem-solving with a grounded mindset.
